* About Photoshop CS5: The book Adobe Photoshop CS5 For Photographers Essentials, 2nd Edition by Michael Freeman and Scott Jehl serves as a helpful guide to using Photoshop's capabilities. One of the most useful editing tools in Photoshop is the Clone Stamp tool, which enables you to quickly and easily remove unwanted parts of an image. This section covers the basics of how to use the Clone Stamp tool to remove unwanted or unwanted parts of an image. Using the Clone Stamp tool A clone stamp can be useful for even a beginner's projects. A clone stamp is used to remove unwanted parts of an image such as background items that are covered with a foreground object, or perhaps just about any object that you'd like to remove from an image. The Clone Stamp tool works best with a bright light source, such as natural daylight, or a soft box. Using a low light source, such as tungsten lighting, will make it difficult to use the tool, as the light doesn't adequately illuminate the surface you're working on. The following steps walk you through the process of using the Clone Stamp tool: 1. Load the image into Photoshop by choosing Image⇒Open. 2. Open the Clone Stamp dialog box by choosing

Edit⇒Create⇒Clone Stamp. 3. With the Clone Stamp tool, click on a part of the image that you want to remove. The highlighted area of the image you click on appears on the surface of the image as a new layer, which is called the cloned layer. 4. The Remove Color dialog box opens with the Clone Source (which is the part of the image you selected in Step 3). The Clone Source is highlighted in the image, and a shadow appears above it in the dialog box. 5. Choose a Color (or Group of Colors) for the Clone Source using the Color Picker tool (if it's not displayed, choose Window⇒Colors). For example, if you had a piece of clothing that was red, and you wanted to remove the red color from the background, you'd choose Red (or R=255, G=255, B=255). 6. Click OK. The image in your document is updated, and you now have a layer that has a new color in its foreground. 7. If you want to remove more than one color from the image, click
