Dark Souls is a monolithic entity of dark â€¦Comparison of the effects of pertussis toxin, phorbol ester, and Ca²⁺ ionophore on vasopressin secretion and cAMP production by S49 lymphoma cells. Several agents have been used to study Ca²⁺-dependent mechanisms in cellular regulation of hormone secretion.

We have compared the effects of these agents on cAMP production, vasopressin release, and binding of vasopressin to its cellular receptor in S49 lymphoma cells. Although phorbol ester and Ca²⁺ ionophore, which activate protein kinase C and increase intracellular Ca²⁺, respectively, stimulate cAMP production in S49 cells, these agents have no effects on vasopressin release or binding of vasopressin to its receptor. However, pertussis toxin, which inactivates the Gi-protein, inhibits cAMP production, inhibits vasopressin release, and decreases the binding of vasopressin. These results indicate that cyclic AMP-dependent mechanisms of vasopressin release and binding of vasopressin to its receptor are not identical, and that phorbol ester and Ca²⁺ ionophore may not activate protein kinase C in S49 cells.Q: Is it possible to calculate the convergence/divergence of $\sum_{k=1}^{\infty} \frac{a_k}{e^{k!}}$? Consider the series $\sum_{k=1}^{\infty} \frac{a_k}{e^{k!}}$, where $a_k = k^k$. What can be said about the convergence of this series? A: It diverges by the ratio test. The rate of decay is e^{k^k} which tends to ∞ for $k \rightarrow \infty$
