Q: Is there a way to check if div is visible in Javascript using only jQuery? In Javascript it is easy to check if div is visible, let b = \$('b'); console.log(b.is('visible')); This example checks if b is visible. Is there any way to do it using jQuery? A: jQuery's :visible selector is equivalent to \$('b').is('visible').visible() Description: Returns true if all of the matched elements are currently displayed within the DOM tree. This includes nested elements, such as form elements within a table, and content that is portrayed by a CSS background, border, or inline background image. Type: Boolean [source] Test let b = \$('b'); let visible = \$('b').is('visible'); console.log(b, visible); b { background: black; color: white; } b 2018-19 HKSAR Youth Award For the 2018-19 Year, the HKSAR Youth Foundation provided with two special awards for exemplary fundraising efforts by individuals or organisations contributing to the youth cause under the Trust for Public Schools or the HKSAR Youth Development Foundation. Q: how can i add php mail function to the theme? I have installed few plugins to theme and I have registered the them, can someone tell me, how can i add php mail function to the theme? If there is some tutorial that I can follow to get through this, that will be great help. I already have some jquery loaded to the theme, and we have tested them in the demo theme without any problem. Thanks. A: In the theme options go to "Plugins" and select the plugins you want to use there Icy-cream. It is a very important and much loved flavour in the UK. Almost anyone who loves ice-cream will tell you that the ideal is to get a scoop of creamy ice-cream, placed next to a wafer-type biscuit, with a cup of strong, sweet tea. So it came as a bit of a shock when some people who I trusted were telling me they could not taste any ice-cream in a typical Grand Marnier chocolate orange. When I said something in response I recall the word "cornflour" being used. I was of course interested to see if anyone else noticed this anomaly and I asked the question on Twitter. Almost everyone I asked said they did not notice anything odd. There were a few exceptions though, and one was David Blundy, a regular contributor to the Guardian and author of a series of books including Home Cook, The Proper Food, Ice-cream and orange chocolate. That's what mum used to order @firstpost why does GM orange chocolate not have ice-cream? — Iain Duncan Smith (@IDS) June 22, 2015 David sent a group email to everybody he could think of. "Friends, family, followers," he wrote, "My co-ex-wife [also an ice-cream aficionado] and her friends are all absolutely certain that when they eat an ice-cream with a chocolate orange, there is NO ice-cream. None, zero, zilch." It's certainly possible that ice-cream is very difficult to detect in an orange chocolate. "This is not necessarily as impossible as it sounds", says Dr Diane Cowen of York University, who researches flavour, "The chocolate may have
